King-Shy Goh

734 Elkus Walk #108, Goleta, CA 93117. Tel: (805) 971-5269
Email: kingshy@engineering.ucsb.edu

Research Interests

Information retrieval technology including search algorithms, high-dimensional data indexing structures, classification and clustering schemes, machine learning algorithms, and automatic image annotation methods.

Education

Ph. D., Computer Engineering University of California, Santa Barbara, 2001 — present.

M.S., Computer Engineering, University of California, Santa Barbara, 1999 — 2001.

B. Eng., Electrical Engineering, National University of Singapore, 1991 — 1995.

Work Experience

Product Engineer, Micron Technology (formerly Texas Instruments Singapore). 1996 — 1999.

- Developed test programs, performed new device characterization and debugging, conducted yield analysis and improvement for production devices, designed high-speed testing methods for SDRAMS with in-house tester designers in Dallas, Texas.
- Participated in Texas Instruments (Singapore) Technical Conference in 1997 and 1998. Papers submitted: 'Aspects of High Speed Testing' (1997), 'Determining the θ_{ja} and Maximum Die Operating temperature at Package Level' (1998), and 'Backend Test Assessment, Benchmarking and Checkout Procedure on Memory Testers' (1998).

Intern, Singapore Telecom. 1994.

- Developed a billing and operation system for medium size paging company. Implemented with Visual Basic and Sybase SQL on Windows NT platform.

Publications

High-dimensional Visual Data Indexing (Invited Paper)
K. Goh and E. Chang, Proceedings of the 6th International Conference on Visual Databases, Australia, May 2002.

SVM Binary Classifier Ensembles for Image Classification
K. Goh, E. Chang and T. Cheng, Proceedings of ACM International Conference on Information and Knowledge Management, Atlanta, Novermber 2001.

Support Vector Machine Pairwise Classifiers with Error Reduction for Image Classification
K. Goh, E. Chang and T. Cheng, Proceedings of ACM International Conference on Multimedia (MIR Workshop), Ottawa, October 2001.

Technical Skills

Programming languages: C, C++, PERL and VHDL.

Operating systems: Linux, Mac OS, Windows.

Languages: Speak, read and write English, Chinese, and elementary Spanish.
